Welcome to the **John G. Wolbach Library**! Wolbach houses one of the world's premier collections of books, journals, conference proceedings, databases, globes, slides, charts, folios, and dissertations in the fields of astronomy and astrophysics. Wolbach is also a community space for all members of the Harvard-Smithsonian Center for Astrophysics, Harvard University, the Smithsonian Institution, and the international astronomical community. Learn more [about the Wolbach Library](#).

The **NASA Astrophysics Data System (ADS)** is an online database of more than 11 million records (including arXiv e-prints and roughly 4 million full-text articles) covering peer reviewed and non-peer reviewed publications in astronomy, astrophysics and physics. The ADS, operated by the Smithsonian Astrophysical Observatory (SAO) under a NASA grant, is located within the John G. Wolbach Library. The two groups collaborate on digital library initiatives such as the [Unified Astronomy Thesaurus](#), [ADS Bumblebee \(Beta\)](#), and more.

Search ADS using proxied links:
